Thanks for your advice. I guess it is easy enough to test the voltage so I will have that done. My original question was if there was a known issue about battery charge habitually lost in this car model, and if so, I could focus on evaluating that potential cause of the dead battery. If the steering wheel is turned ALL THE WAY, that pinches off the hose, stopping the normal flow of power steering FLUID, resulting in the eeeepp sounds you're hearing.
