

# Download Depression And Attempted Suicide In Adolescents

Suicide is considered a possible complication of depressive illness in combination with other risk factors because suicidal thoughts and behavior can be symptoms of moderate to severe depression. Why do adolescents get depression? There are multiple reasons why a teenager might become depressed. For example, teens can develop feelings of worthlessness and inadequacy over their grades. Suicide prevention methods are based on risk factors in light of underlying conditions in addition to prevention of suicidal thoughts and acts. Teen suicide is a major cause of death among teens, though many do not recognize suicide as a serious threat to a teenager's well being. Suicide is the third leading cause of death among adolescents and teenagers.
