What is Narrative Therapy? A Definition. Narrative therapy is a form of therapy that aims to separate the individual from the problem, allowing the individual to externalize their issues rather than internalize them. It relies on the individual's own skills and sense of purpose to guide them through difficult times ("Narrative Therapy", 2017). The Narrative Therapy Initiative, or NTI, provides training, consultation, and community related to narrative therapy ideas, practices, and worldview. Welcome to the Narrative Therapy Bibliography. It's possible to sort the listings by author, year or title. It's also possible to search by keywords. We are excited to invite you to attend the Fifth European+ Conference of Narrative Therapy and Community Work 3, 4, 5 & 6 July 2019 in Antwerp, Belgium
